

Account Set Up Checklist

Account Settings

- Create centers (if needed) and classrooms
- Set period dates
- Finalize student fields

Set Up Roster

- Add administrators
- Add teachers (to all roles)
- Add students and families

Select Training(s)

- COR 101:** Two 1-hour courses that are self-paced, self-guided and illustrate how to use the COR Advantage platform; an overview of how to enter and score observations on the system and family engagement software components.
- Inter-Rater Reliability:** An assessment that measures the accuracy with which your providers are scoring observations.
- Live, Virtual Software Training:** Live, virtual 1-hour step-by-step walk-through of how to navigate the COR Advantage software with time to ask questions. Reach out to your account manager to schedule this!
- *6-hour (One Day):** On-site, facilitated by a HighScope trainer. Includes in-depth study of the COR Advantage Assessment tool, including examination of the COR Advantage categories, items, and indicators, as well as hands-on practice with taking observations and accurately scoring those observations. The 6-hour course also includes an introduction and hands-on practice with the COR Advantage platform.
- *12-hour (Two Day):** The 6-hour training, plus an additional 6-hours with more guided practice taking and scoring observations, using data to guide lesson planning, looking for gaps in data, and a deeper dive into the family engagement software via the COR Advantage platform.
- *4-Week On-Line Training Course:** An on-line training course facilitated by a HighScope trainer that includes an in-depth study of the COR Advantage categories, items, and indicators. Real-life practice opportunities taking and scoring observations with feedback from facilitator, looking for gaps in data and engaging family members in data conversations. This course does not review the COR Advantage platform, but instead focuses on the COR Advantage assessment tool itself.

Available for an additional fee. Reach out to Sonja Caprrese (scaprrese@highscope.org) for specific pricing
