Overview

What is the Kaymbu for Families App?

The Kaymbu for Families app is a streamlined platform in which you can receive updates and information from your child's school, communicate with your child's school, and share photos of your child's at-home play and learning with their teachers.

The Kaymbu for Families app is connected to Kaymbu, which your child's program uses to give you a window into your child's school life. With Kaymbu, teachers capture photos, videos, and notes to document your child's progress and growth, record daily learning and care activities, and share information with you and to give you deeper insight into their learning experiences.
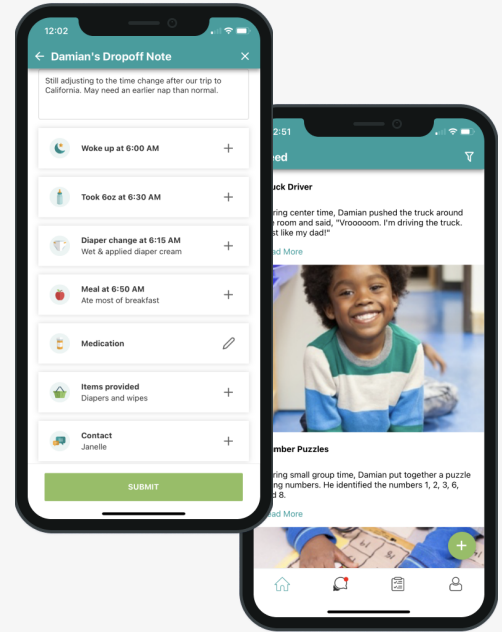

How it works

🏠 **Home:** A feed of content that your children's teachers have shared with you. This may include photos, videos, newsletters, robust daily sheets, or learning portfolios. Click the green plus button to share a photo or video of your child at home with your child's teachers.

✉️ **Messaging:** An inbox of the conversations and announcements that your child's teachers or administrators have sent to you. You can respond to or initiate a conversation by clicking the green plus button. You cannot respond to Announcements, as these are read-only broadcasts from your school.

📝 **Attendance Notes:** The log of all Drop-Off and Absence notes you share with your child's Academy. Click the green plus button to fill out a new drop-off form prior to drop-off or to submit a new absence.

👤 **Profile:** A page to manage your contact information and notification preferences. You can adjust your information and notification settings here.

FAQ

How do I get set up?

Download the Kaymbu for Families app here:

Log in with the phone number or email address your child's school has saved on file for you. Once you do so, you will receive a verification code, and be prompted to enter that code.

Who else can see information in the app?

In the app, you can view information about your child's day and updates from your child's school. Any family members who are connected to your child's profile in Kaymbu will also receive updates and be able to send information to the school. Please note that any messages you send to your child's school will also be visible to any additional family members who are connected to your child's profile.

Who else can see this information?

For any technical questions regarding how to use the app, you can reach out directly to the Kaymbu Support Team by emailing help@kaymbu.com or by calling the technical help desk at (857) 600 - 1540. For any updates to your child or family information, please reach out directly to your child's school.
